Ethan Chen

GM of Edge Computing Platforms BU, ADLINK

2023, March

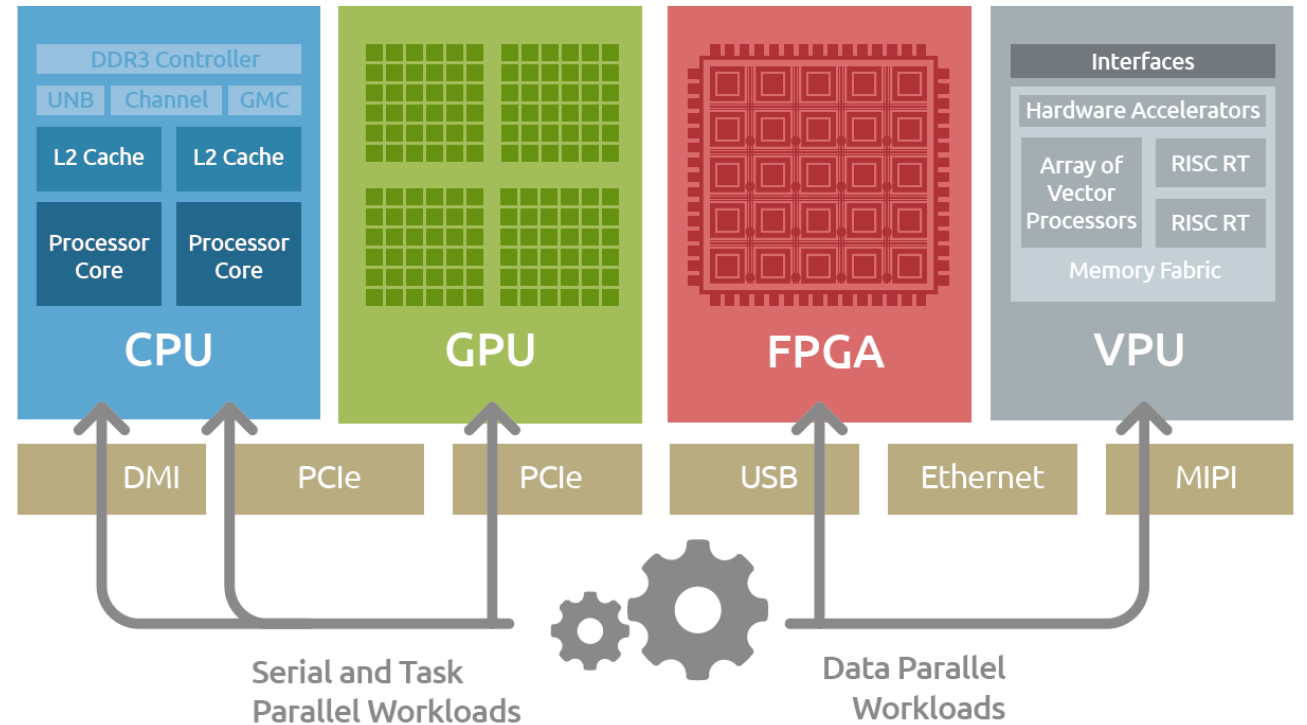

# Industrial Automation in Age of IoT

Horizontal Integrations as Service

# Edge AI is Heterogeneous Computing

ADLINK offers the best Edge AI platforms to meet heterogeneous computing demands and optimize ROI.

# Doubts When Developing / Deploying Edge AI Applications

What hardware combination suits my AI solution best?

How my system performs with xNN?

Can the hardware meet my requirements?

How to I scale out when deploying trained models?

# Evolving with Edge AI Computing

The Ultimate Blend of Performance and Efficiency

# Intelligent Embedded Computers

Enabling Versatile Future-proof Applications

## Complete Solutions

- Multiple form factor options
- Intel® Xeon®, Core™ and Atom® processors
- Integrate GPU computing from NVIDIA® Quadro® GPUs

## Application Featured Design

- Motion/vision/frame grabber cards
- Industrial cameras
- Industrial peripheral modules

## Diverse I/O and Expansion

- Application-specific Connectors
- Flexible I/O Combination & Programmable IC Addable
- Add-on Expansion Slots

## Ruggedized Designs

- -20° ~70°C Wide operating temperature
- Anti-vibration / Shock
- Dust-prone and corrosive proof

## MVP-5200/6200 Series

### System Core:

- R680E PCH (**Forward Compatible to Raptor-S**)
- CPU (35W) : i9-12900TE/ i7-12700TE/ i5-12500TE/ i3-12100TE
- CPU (65W) : i9-12900E/ i7-12700E/ i5-12500E/ i3-12100E
- **DDR5 3200 up to 128GB**
- Wide Power Input : 9-32Vdc supported
- **M.2 2280 NVMe** Supported (Gen3 x4)
- 5G/LTE/WiFi6 Supported
- FM (Function Module) Board Supported

### Back Plan PCIe I/O Slots:

- **PCIe Gen4 x16** supported
- 4x 2.5" SATA drive bay, hot swappable, RAID 0/1/5/10

### Environmental:

- Operating Temperature -20~60°C

**One-stop,  
Fully Integrated  
Solutions for Faster  
Deployment.**

## Extensive Selection Of Pre-validated Motion, Vision, And I/O Cards

IMB-M47H features with rich expansion I/O, includes one PCIe x16 Gen5, one PCIe x4 Gen3, one PCIe x1 Gen3, and four PCI 2.2 slots for functional expansions like graphics cards, LAN cards or motion control cards. It also provides an M.2 A-key slot for Bluetooth and Wi-Fi, and an M.2 M-key for storage.

From CPU to Board	Slot1	Slot2	Slot3	Slot4	Slot5	Slot6	Slot7
	(PEG)	(PCI1)	(PCIe1)	(PCIe2)	(PCI2)	(PCI3)	(PCI4)
Bandwidth	PCIe 5.0	PCI 2.2	PCIe 3.0	PCIe 3.0	PCI 2.2	PCI 2.2	PCI 2.2
Physical slot	x16	PCI	X4	X1	PCI	PCI	PCI

ADLINK's wide selection of pre-validated motion, vision, and I/O cards guarantee compatibility and ensure fast and convenient deployment for the full spectrum of demanding industrial applications.

A New Era of  
Professional  
Graphics

# MXM-AXe

MXM 3.1 Type A based on Intel® Arc™ GPU

With built-in ray tracing hardware, graphics acceleration, and machine learning capabilities, the ADLINK MXM-AXe module unites fluid viewports, the latest in visual technologies, and rich content creation all packed within a single form factor.

- Up to 4x Displays, with Audio and Dolby Vision® Support
- Ray Tracing Hardware Acceleration
- Dedicated AI Acceleration
- Industry First AV1 Hardware Encode
- 4GB High Speed Memory

[adlinktech.com/en/MXM-AXe](https://adlinktech.com/en/MXM-AXe)

# A New Era of Professional Graphics

As a Titanium partner of Intel, ADLINK has always been one of the pioneers in delivering Intel-powered modular solutions in the embedded world. This time, ADLINK integrates Intel's latest line of powerful, discrete graphics — Intel® ARC — on the embedded MXM form factor. It leverages Intel's well-established graphics ecosystems, such as OpenVINO™ for AI, Intel® OneAPI management tools, that edge developers have enjoyed and relied on for years.

This isn't a mere new line of GPUs, but one that makes your migration from integrated to discrete graphics seamless and fully transparent.

## Key Features

### 4GB GDDR6

High Speed Memory

### 112 GB/s

Memory Bandwidth

### 8x RT

Dedicated Cores

### 4x DISPLAY

Supported at 4K, 60Hz

## Intel GPU Architecture

X<sup>e</sup> HPG microarchitecture is engineered from the ground-up to deliver high performance, efficiency, and scalability for creators and professional workloads.

- New X<sup>e</sup>-cores with built-in XMX AI capabilities
- Advanced 3D acceleration hardware
- Ray Tracing Units

# ADLINK MXM-AXe

## Specifications

<b>PERFORMANCE</b>	Ray Trace (RT) Cores	Up to 8 Xe Cores
	Execution Units (EU)	Up to 128x
	XMX AI Cores	Yes
<b>MEMORY</b>	PCIe® Support	Gen4 x8 with 3.0 Backwards Compatibility
	Dedicated Memory	4GB of GDDR6
	Bandwidth	112 GB/s
	Interface	64-bit
<b>DISPLAY</b>	Outputs	4x DP2.0 or HDMI2.1
	Support (HDR enabled)	4x 3840x2160 (4K UHD, 60Hz)
		2x 5120x2880 (5K UHD, 120Hz)
		2x 7680x4320 (8K UHD, 60Hz)
		1x 5120x1440 (5K Ultrawide, WUHD, 240Hz)
<b>HARDWARE ACCELERATION</b>	Decode	VC, VC1, MPEG2, HEVC-10bit, VP9, JPEG
	Encode	AV1, AVC, MPEG2, HEVC, VP
	Ray Trace	Yes
	AI Engine	Yes
	VR Ready	Yes
<b>POWER</b>	Consumption	A370M 35-50W TGP
		A350M 25-35W TGP
<b>GENERAL</b>	Form Factor	MXM Type A (82mm x 70mm)
	OS Support	Microsoft Windows 11 / Windows 10
<b>Ordering Information</b>	MXM-AXe-A370M	MXM 3.1 Type A Intel® ARC™ A370M Graphics at 35-50W, 4GB GDDR6, 4x DP2.0 or HDMI2.1
	MXM-AXe-A350M	MXM 3.1 Type A Intel® ARC™ A350M Graphics at 25-35W, 4GB GDDR6, 4x DP2.0 or HDMI2.1

# What is EVA

ADLINK EVA focus on Edge inference and provide integrated SDK help customers build the AI application with trained AI network.

- **Easy to implement**
- **Easy to integrate**
- **Easy to deploy**
- **Easy to extend**

# EVA Architecture

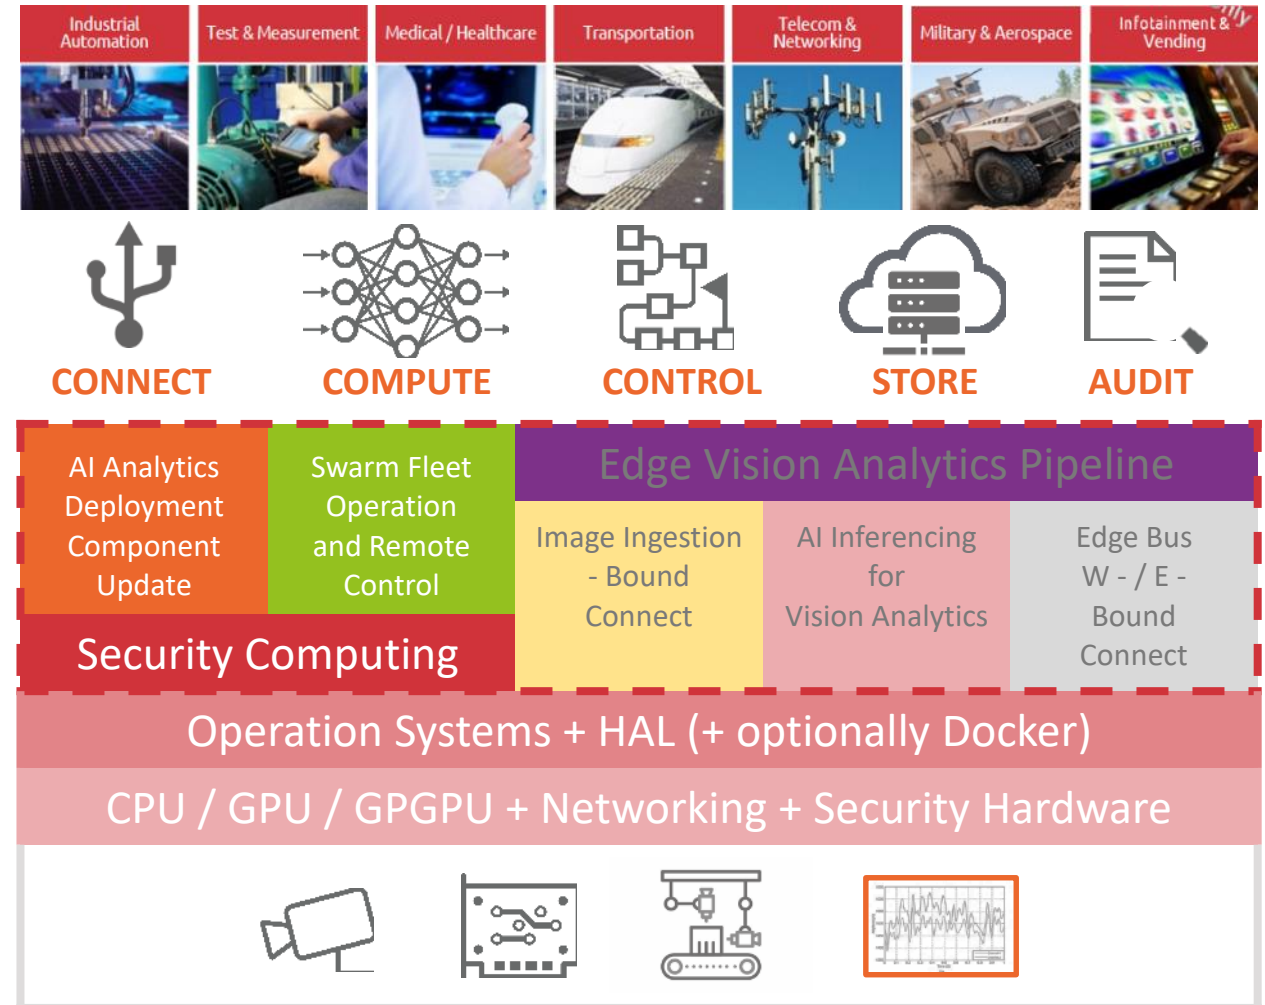

Facilitating EDGE AI Applications

SERVICE

- Enable **edge data analytics**
  - Capture video and images
  - Transcode and process vision data
  - Analyze data with deep learning inference
  - Trigger actions at the edge

ARCHITECTURE

- Make applications **platform agnostic**
  - Decouple video source (industrial CAMs)
  - Decouple deep learning engine and hardware (NVIDIA TensorRT / Intel OpenVino / ...)
  - Decouple OS (Linux / Windows)
  - Decouple edge connectivity  
Pub/Sub EVA data (on ROS2 / Data River / ...)

# Two Weeks To PoC

**2 WEEKS** VS. **12 WEEKS**

Capture camera images in 15 mins with the ready-to-use camera plug-in

Use EVA supported optimized models, just focus on training and application

Intuitive GUI, few hours to construct the AI image processing pipeline

Powerful pre-view function makes the verification and profiling easier

Need few days learning the camera API

Non-optimized open-source models take weeks to retrain and modify

Weeks to deploy the model into a AI image processing pipeline

Video stream or frame verification and optimization takes huge effort to do

- Domain specific, optimized pre-trained models provide an excellent starting point for training/PoC
  - Simplified, zero-coding IDE doesn't require AI expertise
    - Demo in days and deploy PoC in two weeks

# EdgeGO – The Edge-Native Platform for Remote Device Management

## Remote Management

### Device Management

- Remote monitoring and control
- Mass configuration and maintenance
- Device onboarding

### Event Notification

- User-defined events
- Alerts via SMS, LINE, Wechat...

### Dashboard Visualization

- Pre-built basic metrics
- Customizable interface, statics, and charts

EdgeGO

## Edge Native

### Edge Applications

- Edge AI
- Data acquisition & analysis
- OTA & data backup

### Cloud Connectivity

- Connects Cloud through dedicated EdgeGo server
- Collaborates with AWS, Azure, Allxon...

### Edge Security

- Endpoint protection via anti-virus
- Network defense following cybersecurity guidelines

COM Module

MCM Plus

AVA

IoT Gateway

# EdgeGO – Full Lifecycle Management for Edge Devices

## Administration

- User authentication and authorization integration with LDAP compatible services.
- Device and operation access control by user groups and roles.
- Web-based UI for both workstations and mobiles.

## Edge device management

- Device registration and onboarding.
- Organizing devices to groups and integration with LDAP compatible services.
- Real-time device monitoring and remote control.

## Edge device control

- Remote device configuration.
- Remote device desktop or terminal access.
- Remote device power control.
- Remote device peripheral control.
- Remote device data import and export.
- Remote task scheduling and management.

## OTA update

- Remote update of device software and firmware.

## Edge device security

- Strong encryption and integration with PKI.
- System security with Trend Micro and TXOne.
- Data backup and restore with Synology.

## Monitoring and alerts

- Real-time telemetry, events, diagnostics, and logs collection.
- Rule-based edge triggered or server triggered alerts and automated actions.
- Customizable dashboards.

## Notification

- Group-based and rule-based notification configuration.
- Customized notification templates.
- Notification connectors to email, LINE, WeChat, and WhatsApp.

## Application

- Edge device application software certification, installation and management.

## Multiple deployment

- On-premise deployment with EdgeGO on-premise servers.
- On-premise deployment in enterprise IT infrastructure.
- Cloud deployment in ISP clouds, such as AWS or Azure.

## 3<sup>rd</sup> party cloud or application integration

- Users, devices, and groups integration with LDAP.
- Accessing EdgeGO services by RESTful API.
- Real-time messaging and remote control with AMQP over websockets.

# Trusted Industrial Computer Partner

**Electronic  
Manufacturing**

**Semiconductor**

**Machine  
Vision**

**Test and  
Measurements**

## Leading Technology

- Intel's Latest Gen. processors, vPro, Microsoft Win10
- High Speed PCIe (up to PCIe gen 5)

## Application-Oriented Design

High-integrated Solution with Machine Vision & Motion Application (Camera, GigE or USB Card, I/O Module)

**intel**

**PCI  
EXPRESS**

## Rugged I/O Design

- Unique Power design
- 15 micro inches gold/metal plating connectors
- EN55032 Class B Radiation Test Pass

## Customization Services

- Longevity Support
- Customized Design Service
- Fast and Flexible Configure-to-Order Services

# Thank you.
