Microsoft Cloud is here to empower you

Transform your business
with the largest ecosystem
in the industry

Automate operations
with Edge AI

Develop solutions
with best-in-class tools

Operate from a
single control plane

Secure your
environment

Cloud technology for every kind of business

Azure Confidential Computing

GOAL

Achieve the highest levels of ***privacy*** for your most **sensitive workloads** by encrypting your data in use in the cloud and on the edge

One of the first cloud vendors offers Intel Sapphire Rapids Confidential Computing

Azure Confidential Computing on 4th Gen Intel Xeon Scalable Processors with Intel TDX

Posted on January 10, 2023

[Mark Russinovich](#), Chief Technology Officer and Technical Fellow, Microsoft Azure

Microsoft continues to be the [cloud leader in confidential computing](#), and the Azure team is excited to continue our leadership by partnering with Intel to offer confidential computing on 4th Gen Intel Xeon Scalable processors with Intel Trusted Domain Extensions (Intel TDX) later this year, enabling organizations in highly regulated industries to lift and shift their workloads that handle sensitive data to scale in the cloud. Intel TDX meets the Confidential Computing Consortium (CCC) standard for hardware-enforced memory protection not controlled by the cloud provider, all while delivering minimal performance impact with no code changes.

Mark Russinovich

Chief Technology Officer, Microsoft Azure

Azure Confidential Computing

EXISTING ENCRYPTION

CONFIDENTIAL COMPUTING

Data at rest

Encrypt inactive data when stored in blob storage, database, etc.

Data in transit

Encrypt data that is flowing between untrusted public or private networks

Data in use

Protect/encrypt data that is in use, while in RAM, and during computation

Insider threat

privileged admins abusing rights

Hackers

exploiting bugs in the Hypervisor/OS

Third parties

accessing data without customer consent

Protect against

The **protection of data in use** by performing computation in a hardware-based, attested Trusted Execution Environment (TEE).

Verifiable assurance for data integrity, code integrity, and data confidentiality

Confidential Computing Consortium

Microsoft is a founding member of this open source community dedicated to defining and accelerating the adoption of confidential computing.

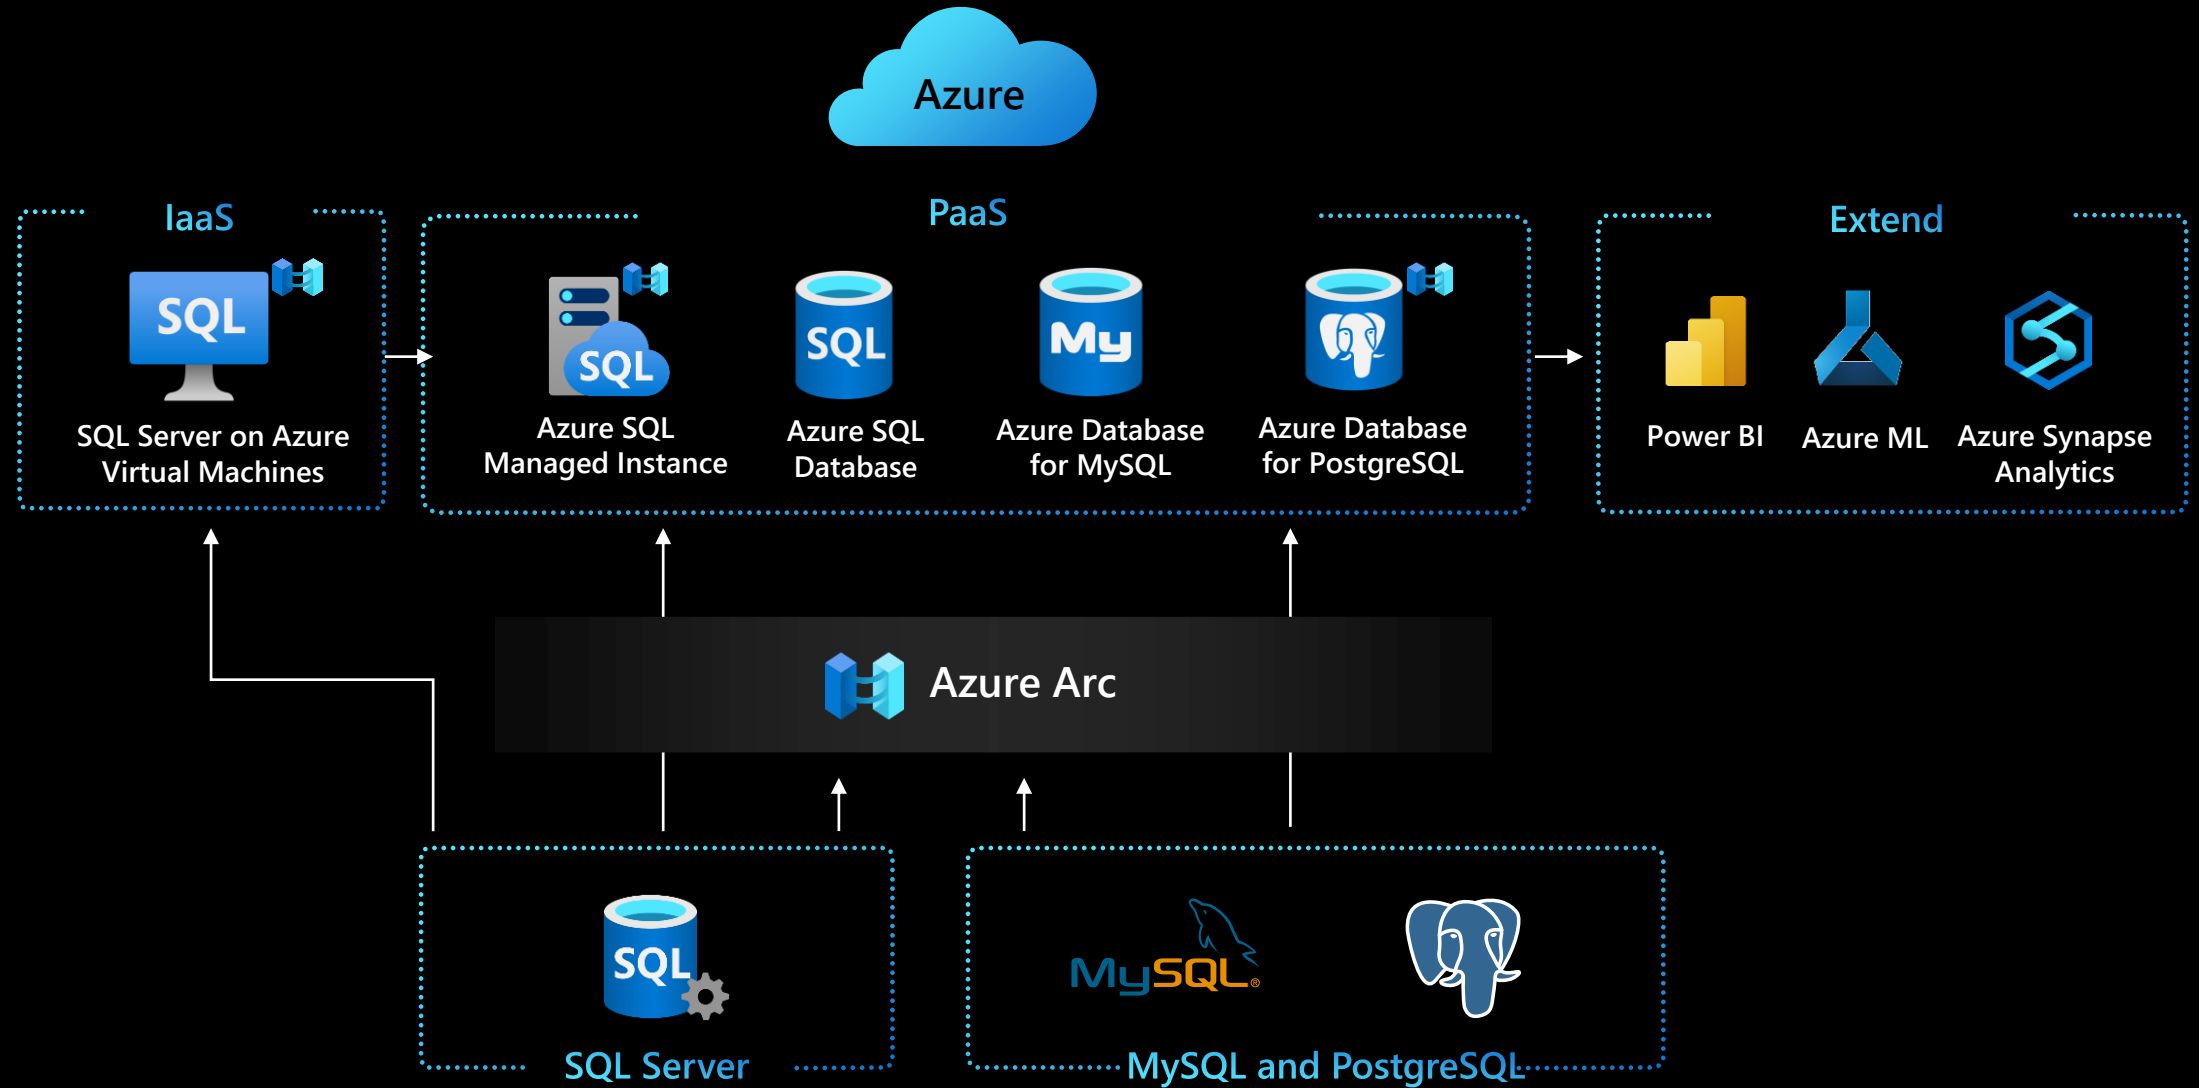

and growing...

Confidential computing @ Azure

Azure confidential computing offerings cover VMs, containers, and also Azure PaaS/SaaS offerings

Category	Service	Status
Services	 SQL IaaS on confidential VMs ^{NEW}	GA
	 SQL always encrypted with secure enclaves	GA
	 AVD on confidential VMs ^{NEW}	Public Preview
	 Azure Managed CCF ^{NEW}	Limited Preview
	 Managed HSM	GA
Containers	 Microsoft Azure Attestation	GA
	 Azure Confidential Ledger	GA
	 Azure Confidential Databricks	In progress
	 Azure ML	In progress
	 App enclave Intel SGX nodes on AKS	GA
Virtual machines	 Confidential VM worker nodes on AKS ^{NEW}	GA
	 Confidential containers on ACI ^{NEW}	Limited Preview
	 AKS Confidential Pods (incl. AKS multi-tenancy)	In progress
	 DCsv2/DCsv3/DCdsv3 Intel SGX VMs	GA
	 Intel Sapphire Rapids TDX VMs	In progress
