GE Healthcare Applies Artificial Intelligence to Improve Patient Experiences

Products and Solutions Intel® Core<sup>™</sup> processors Intel® Distribution of OpenVINO<sup>™</sup> Toolkit services. Medical advancements have enabled new insights for clinicians, helping them diagnose, treat and monitor patients more efficiently. As GE Healthcare System designed and developed its ultrasound product lines, it collaborated with Intel, a trusted partner of more than 15 years. GE Healthcare leveraged Intel® Core™ processors on Venue to meet the computational needs and used the Intel® Distribution of the OpenVINO<sup>™</sup> toolkit to quickly meet the AI applications' performance requirements during development of Vivid Ultra Edition features.

GE Healthcare System is a leading provider of medical technology and Digital

solutions, focused on enabling clinicians all over the world to make faster, more

informed decisions through intelligent devices, data analytics, applications and

Today, it has become a preeminent imaging modality and I don't see much limit to that because it's mobile, inexpensive, simple to use, and you can make quick decisions. And now Al is just going to bring it to the next level."

Anders Wold, President and CEO of Ultrasound, GE Healthcare
